# N Siva Bhadra

7330846900 — sivanibhadra@gmail.com — linkedin.com/in/siva-bhadra — github.com/sivabhadra2911

## Education

**SRM Institute of Science and Technology** **2022 – 2026**
*B.Tech, Computer Science and Engineering*
*CGPA: 9.01*

**Sri Chaitanya Junior College** **2022**
*81.1%*

**Sri Chaitanya Techno School** **2020**
*96.33%*

## Skills

**Languages** C, C++, Python, Java, JavaScript, TypeScript

**Backend** Node.js, Express.js, RESTful APIs, Sequelize, JWT, Microservices, API Development

**Database** PostgreSQL, Redis, MongoDB, MySQL, Firebase

**Frontend** React.js, HTML5, CSS3

**Tools & DevOps** 'Unit Testing, Postman, Git, GitHub, Docker, Debugging, CI/CD, AWS

**Concepts** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, SDLC, Agile, System Design, Full Stack Development

**Platforms** ServiceNow, Salesforce, Power BI

## Experience

**Miebach Consulting**
*Associate IT Consultant* *Bangalore, Karnataka*

- Engineered and enhanced client-facing features within a Warehouse Management System (WMS) using a full-stack, microservices-based architecture, collaborating cross-functionally with business and engineering stakeholders
- Deployed and maintained services across AWS and Azure cloud environments, supporting scalable, client-hosted infrastructure and streamlining release cycles
- Designed and optimized PostgreSQL data models and queries to support high-volume warehouse transaction workflows, improving data accuracy and query performance
- Conducted root cause analysis on system discrepancies across distributed services, driving defect resolution and reducing recurring production issues
- Participated in code reviews, architecture discussions, and deployment/monitoring activities, applying an agile mindset while navigating ambiguity in evolving client requirements

## Projects

**SkillSpace**
*MERN Stack*

- Developed a web platform connecting freelancers and recruiters with enhanced features over traditional platforms.
- Designed a personalized dashboard with scheduling and task management tools.
- Integrated job tracking, performance insights, and a collaborative community space.

**TeamPulse**
*Node.js, TypeScript, PostgreSQL, Sequelize, Redis*

- Built a Slack-integrated employee wellness bot with a scalable REST API in Node.js and TypeScript, consumed via Slack slash commands
- Modeled structured mood/session data using Sequelize ORM over PostgreSQL, ensuring relational integrity across users, entries, and trend aggregates
- Used Redis to cache active session state and frequent trend queries, reducing repeated database load
- Wrote Jest unit tests for core scoring and aggregation logic to catch regressions before deployment
- Designed with data privacy in mind through scoped access and anonymized aggregation, reflecting secure handling of sensitive user data

**CrackIt AI**
*Node.js, TypeScript, PostgreSQL, Redis, LLM Integration*

- Built an AI-powered interview-prep REST API that generates company- and role-specific mock questions, tips, and key topics on demand

- Designed a PostgreSQL schema with Sequelize to persist and reuse generated prep content, reducing redundant LLM calls and improving response latency
- Implemented Redis caching for high-frequency company/role queries alongside rate-limiting middleware to control API cost and abuse
- Applied prompt engineering to structure LLM outputs into consistent, parseable JSON for reliable rendering
- Tested core caching and request-handling logic with Jest

## Certifications

- Cloud Computing – Oracle
- Foundations of Cybersecurity – Coursera
- ServiceNow System Administrator – ServiceNow
- Cisco Networking – Cisco
- Salesforce AI Associate

## Achievements

- Committee Head – Directorate of Student Affairs
- Flipkart Grid 5.0 Participant
- SRM Merit Scholarship
- Badminton Player
- Languages: English, Telugu, Hindi
